

STORM SUMMARY 1-12-25

A main band of snow reached Rockford in the early morning hours that stretched to Chicago. Started as flurries and transitioned to light snow and then to drizzle by afternoon. All regions were on alert monitoring conditions.

Southern regions ended up receiving coverage earlier in the day and were serviced with deicing and plowing services. Going into the night, temperatures dropped to the low teens and flurries occurred causing all VIP Red Alert properties to receive deicing applications.

O'Hare officially had .3", Romeoville 1.5", MDW 1.3", and Rockford 0.1".
