

## STORM SUMMARY 12-30-15

While all eyes were focused on an area of light snow and snow showers over west central Illinois and Iowa, a narrow band of moderate snow and snow showers developed over La Salle and Grundy Counties between 5-6am and quickly spread east and northeastward between 6-8am. By mid am, the snow had pretty much departed the area and the activity further west diminishes before ever reaching the local area. The heaviest snowfall was from a line near the loop to Morris eastward where there were some 1-3 inch totals. The official snowfall at ORD was 1.1 inches which pushed the monthly December total to 4.5 inches and the season to date total to 15.7 or 6.4 inches above normal. Rockford had only .2 and a December total of 5" with a season to date total of 13.8 or 1.1 above normal.
