

## STORM SUMMARY 3-2 & 3-16

Light snow began 9-11pm. activity shriveled across the area by 2am on 3-3. Additional areas of light snow and flurries developed 5-7am. This activity was then off and on until 6-8pm. Activity was heaviest northwest Indiana to south of I80. Many road surfaces remained just wet north of I80 during the duration of the event. This was mostly a salting operation north of I80. Officially ORD had .8 of snow.
