

## STORM SUMMARY 12-4-16

A trough of low pressure produced the first measurable snowfall of the season to the area. Snow spread into Rockford 7-8am and 8-10am Chicago area.

Snow began light for the first hour or two before turning to a moderated snowfall till late afternoon. Lingering light snow ended from west to east between 6-8pm. There was a lot of banding on radar which resulted in non uniform snowfall totals from one location to another. Salting and plowing was required area wide. Due to warmer ground temperatures there was a little less snow on the pavement due to some initial melting but there was more than enough to plow. The official snow totals were: O'Hare 6.4, Rockford 5.3, Romeoville 8.1
