

## STORM SUMMARY 11-10-17

Lake effect flurries and snow showers moved from northwest Indiana up the Illinois shoreline. The snow first spread into southeast Cook up to the loop between 7 and 8am. Some light flurries and snow showers occurred as well over northeast Cook and out to ORD 7 to 9am. Heavier snow showers moved into northeast Cook and up into Lake County after 9-10am till 2-3pm. Surface temps were colder when the first flakes moved up towards the lake where some slick surfaces occurred during the am commute. Surface temps had a chance to recover into the low to mid 30s by the time the heavier snow intensities moved north of the loop. Still some sidewalks and parts of some lots over northern Cook County around Mount Prospect, Arlington Heights, Long Grove and on up into eastern Lake County.

This light covering required some salting and even shoveling of sidewalks.
