## STORM SUMMARY 12-22-17

An extremely light system passed through the area from 10pm on the 21<sup>st</sup> to 10am on the 22<sup>nd</sup>. Sub surface temps were running in the mid 30's and air temps got as low as 32 degrees.

Due to the warmer ground temps, the precipitation that fell did not effect most of the Chicagoland area and immediate suburbs however Rockford received a mixed bag from a coating on surfaces to very slushy parking areas on some properties. Deicing of parking lots and sidewalks was needed only in the Rockford region.
