

STORM SUMMARY 1-11-18

Temperatures were in the 50s into mid-afternoon. Some rain and showers occurred at times from 7am to 2-3pm. Rain diminished to drizzle and sprinkles around 3pm which lasted till 7pm. Some of the drizzle turned to freezing drizzle prior to ending. A strong cold front moved through the area late afternoon which sent temperatures sharply down for the evening commute. Readings went from 50 at 3-4pm to 39 by 6pm and to 26 at 7pm. The days rainfall of up to .40 of rain left surfaces wet and when temperatures fell, this resulting in flash freezing of water on pavement and sidewalks. This required salting.
