

## STORM SUMMARY 12-8 & 9-17

A band of snow showers moved through the areas north of I88 between 8-10pm. This left some surfaces with a light coating and even caused some icy surfaces from Roselle to Wheeling. Periods of snow showers and flurries moved back in around midnight and this was off and on till mid to late AM. Most areas just had trace amounts after 6-8am on the 9<sup>th</sup>. Some surfaces that were treated on the 7<sup>th</sup> saw the residue take care of the initial onset of snow that fell. Most areas had less than an inch resulting in nothing more than a salting operation. Officially ORD had .6, Rockford .2 and Romeoville .4.
