

## STORM SUMMARY 11-9-18

A system of light snow tracked into the area on Thursday the 8<sup>th</sup> and into the morning hours on the 9<sup>th</sup>. Pavements temperatures were still running 33-34 degrees which helped parking surfaces stay mostly wet throughout the night. As the air temperature dropped many elevated surfaces such as sidewalks and parking garages slickened up. These areas we treated by our sidewalk crews and salt trucks preformed spots treatments in parking areas where necessary.
