STORM SUMMARY 12-12-18

Light snow and freezing drizzle was most active from Rockford to Wheeling northward. The precipitation entered the Rockford area around 5am and hit the remaining areas around 6am. The activity on radar was very light and temperatures were running above 32 degrees by 5am but surface temperatures were still below 32 until around the 8:30-9AM hour. All zero tolerance accounts were serviced in the early morning hours to prepare for the start of the workday.
