STORM SUMMARY 4-15 & 16-18

An area of moderate to heavy snow developed mainly north of I90 between the hours of 7am to 11am on the 15th. This higher intensity snow cause roads to become snow covered and slippery conditions. Deicing operating were needed for our northern tier properties.

Later during the evening on the 15th a light to moderate snow continued over northern Illinois especially areas north of I88. This snow caused roads again to cover and slippery conditions were present. The light snow continued through mid morning on the 16th. Crews were again dispatched to handle lot and sidewalk deicing during the overnight hours to make sure conditions were safe for the start of the work week.
