

STORM SUMMARY 4-4-18

Another late evening system moved through the area as our cold weather continued for the month of April. Grass areas accumulated and began covering first during the later pm hours on the 3rd. The constant on set of new snow flurries and dropping temperatures finally took its toll as parking lots and sidewalks began to cover over around the 1-2am timeframe. As the 3-4 am timeframe approached almost all hardscape surfaces were fully covered and areas such as Rockford even received upwards of 1" and over on these surfaces which required plowing as well. Most areas only needed sidewalk services and parking lot deicing.
