

STORM SUMMARY 1-26-19

Light snow spread back into the area 2-4pm and diminished 9-10pm. The snow was very light and fluffy. Originally this was anticipated to be just a salting event but due to the temperatures the “fluff” factor took hold and full plowing operations were needed across all regions. Temperatures were in the 10-12 range while it snowed. Officially ORD had 1.7 inches, Rockford 1.5 inches and Romeoville 2.7 inches.
