

STORM SUMMARY 2-4 & 5-19

Monday 2-4 saw temperatures reach highs into the 50's. These temps dropped rapidly to below freezing by midnight and 22 by 7am on 2-5. The winds were fairly strong 8-20mph which helped dry out surfaces before the temperatures dropped. Areas that did not dry out due to some freeze thaw were puddles in parking lots and snow pile run off. Trucks were dispatched to spot treat and complete partial lot deicing to keep surface safe.
