STORM SUMMARY 2-6 & 7-19

A winter weather advisory 6pm till 9am for Rockford to Lake County as well as Kane and DeKalb Counties for more icing issues. Freezing rain and drizzle occurred from DeKalb to Waukegan after 5-7pm. Surface temperatures fell with dusk back down to 31 degrees resulting in the return to freezing rain during the evening hours on 2-6. South and east of this line had temperatures above freezing and rain and drizzle along with even some thunderstorms. 10 to .20 of ice was reported from DeKalb to Rockford to Waukegan. This again resulted in the need for multiple rounds of salt to try to control the icing. Temperatures rose above freezing even in the advisory area between 8-9am. Light rain and drizzle continued off and on till 4-5pm. Temperatures turned sharply colder 4-6pm with winds gusting 40-51 mph which we were hoping would dry many surfaces but most areas had a chance to flash freeze along with puddles and undulations in the parking lots turned to slush and ice. There were also some flurries between 7-11pm.
